

# Proofademic

## The AI detector built for education.

Proofademic is an AI detection platform built specifically for academia. It helps educators, students, institutions, and publishers identify AI-generated writing using sentence-level analysis that shows exactly which parts of a document read as AI-written, rather than a single pass or fail score. It is designed around the realities of academic work: fairness for non-native English writers, support for 23 languages, and a built-in plagiarism checker for a complete academic integrity workflow.

### WHAT MAKES PROOFADEMIC DIFFERENT

- **Built for academia, not retrofitted.** Positioned specifically for education, where the cost of a false accusation is high.
- **Sentence-level analysis.** Each sentence is scored individually, so reviewers can see precisely where AI writing appears instead of relying on one document-wide number.
- **Fairness-first.** Built to reduce false positives that disproportionately affect non-native English writers.
- **A full academic integrity stack.** AI detection and plagiarism checking in one platform, across 23 languages.

### KEY FEATURES

- **AI Text Detector** - core detection of AI-generated writing.
- **Sentence-Level Detection** - per-sentence scoring that highlights exactly which passages read as AI-generated.
- **ChatGPT Detector** - tuned to flag text from ChatGPT and comparable models.
- **Paraphrase Shield** - catches AI text that has been reworded to evade detection.
- **Multilingual Detection** - detection across 23 languages.
- **Batch Scan** - upload multiple documents at once and export shareable PDF reports.
- **Plagiarism Checker** - source-matching plagiarism detection alongside AI detection.
- **AI Detector API** - programmatic access for LMS and institutional integrations, via [platform.proofademic.ai](https://platform.proofademic.ai).

### WHO IT IS FOR

- **Teachers** reviewing student submissions for academic integrity.
- **Students** checking their own work before they submit.
- **Institutions** setting fair, consistent AI policies across departments.
- **Publishers** screening manuscripts and submissions at scale.
